

Although it is obvious, we should make a clear statement that:

**Forward sPHENIX:
the forward direction is NORTH in 1008.**

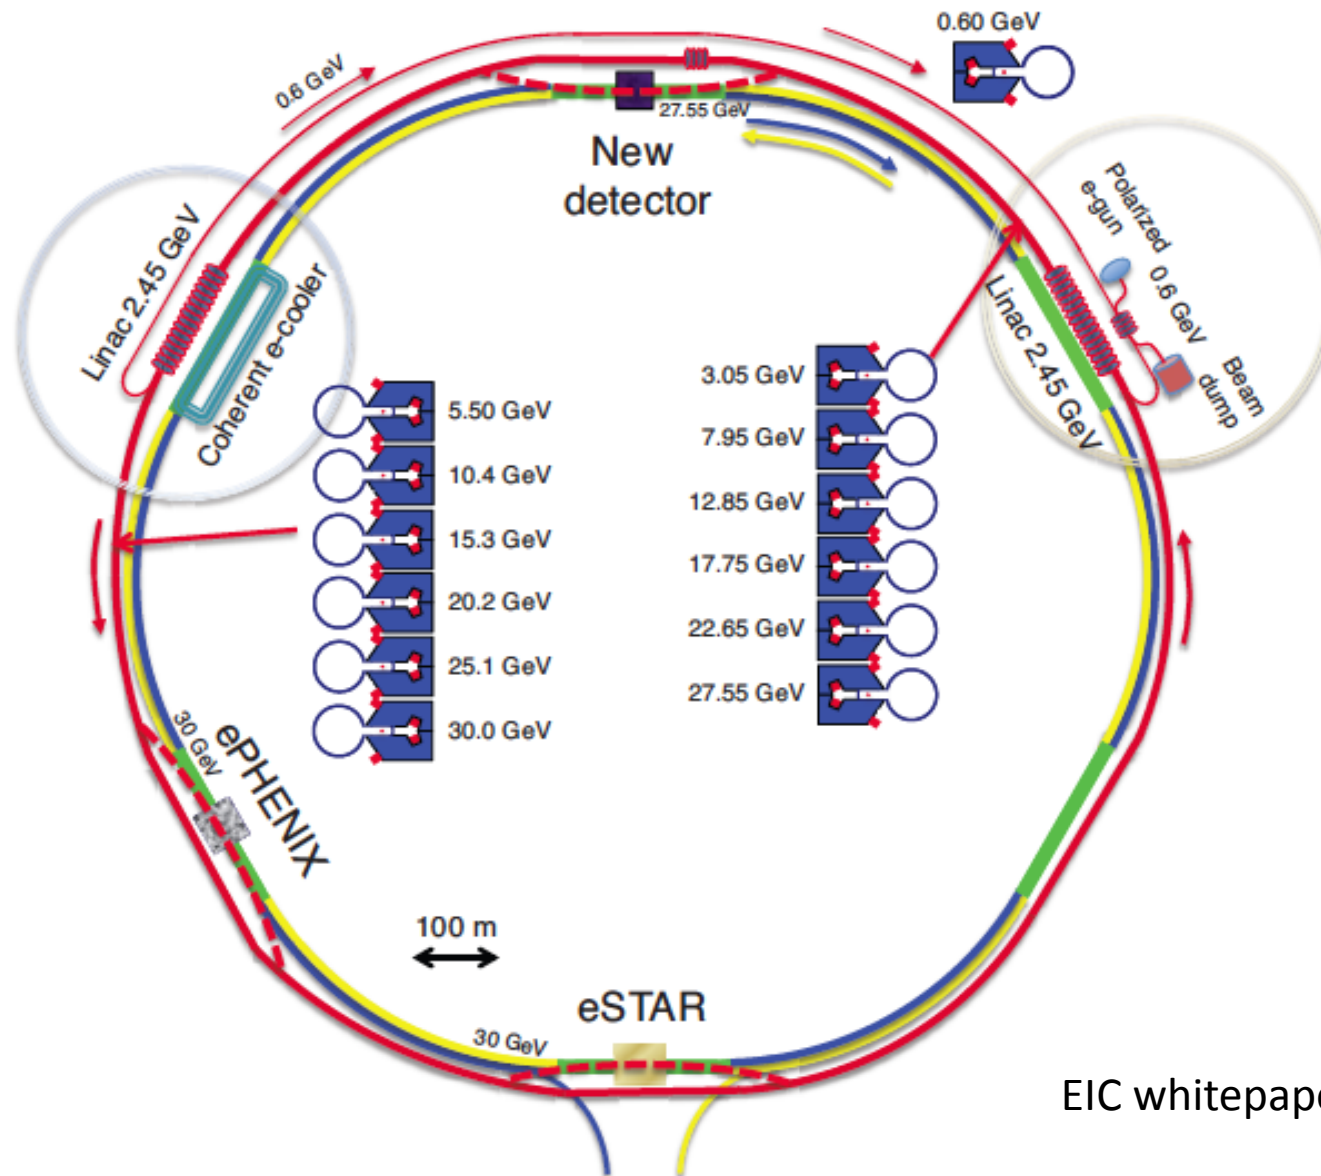

Xiaodong Jiang, Los Alamos
Feb. 5th, 2013. fsPHENIX phone meeting.

We went through this discussion a year ago.
However, it is not so obvious to the rest of the PHENIX Collaboration.

Blue: Clockwise.
Yellow: Counter-Clockwise

In the eRHIC design, the electron beam is Counter-Clockwise (Yellow direction).

EIC whitepaper, page 114.

A reminder: in Run-8 d+Au

d in BLUE, South → North in 1008.

Au in YELLOW, North → South in 1008.

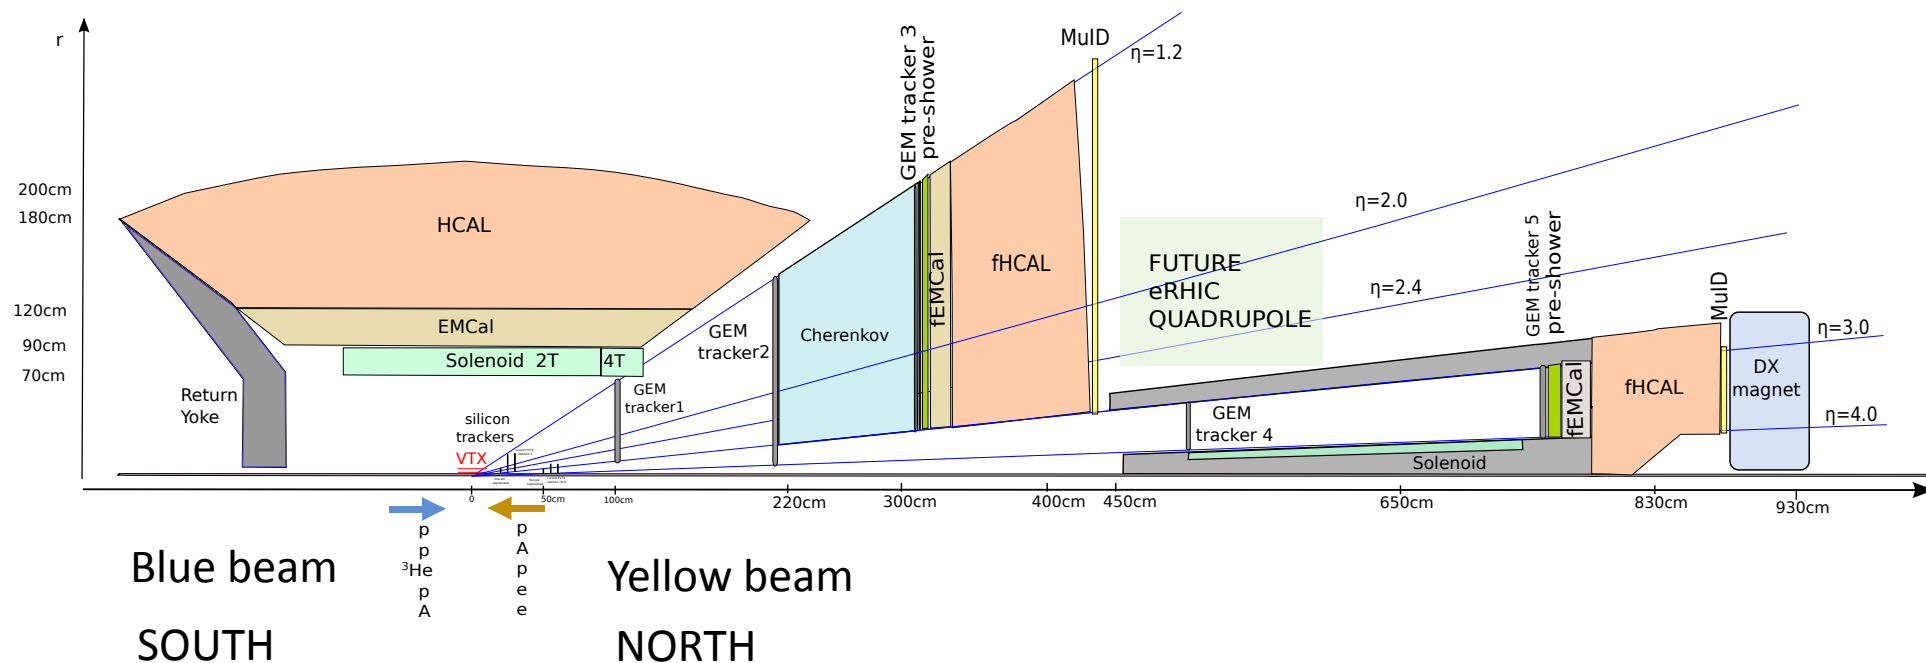

STAR FMS faces the BLUE beam.

In the future p+A collisions, **STAR wants proton beam in BLUE.**

and...

The future polarized ^3He beam will be in BLUE.

Forward sPHENIX is NORTH in 1008 (Cesar 1/31/2013)

IS MOVED OUT TO ASSEMBLY AREA.
S) IN COPPER NOSE CONE PER MS33537.

North
